

How to Measure Your Custom Fence Privacy Screen

Before You Start

- ✓ Use a measuring tape and measure directly against your fence, edge to edge.
- ✓ Measure at the actual size you want covered, we automatically add 1"-2" of leeway to your final screen size, so you don't need to add extra yourself.
- ✓ In case your fence measures 6 ft in height and 10 ft in width, enter the exact numbers in the measurement boxes without any buffer. Your finished screen will arrive slightly larger, around 6'1"- 6'2" in height and 10'1"-10'2" in width, so it fits with ease.

MEASURING EXAMPLE

Your Fence Size (What You Measure)

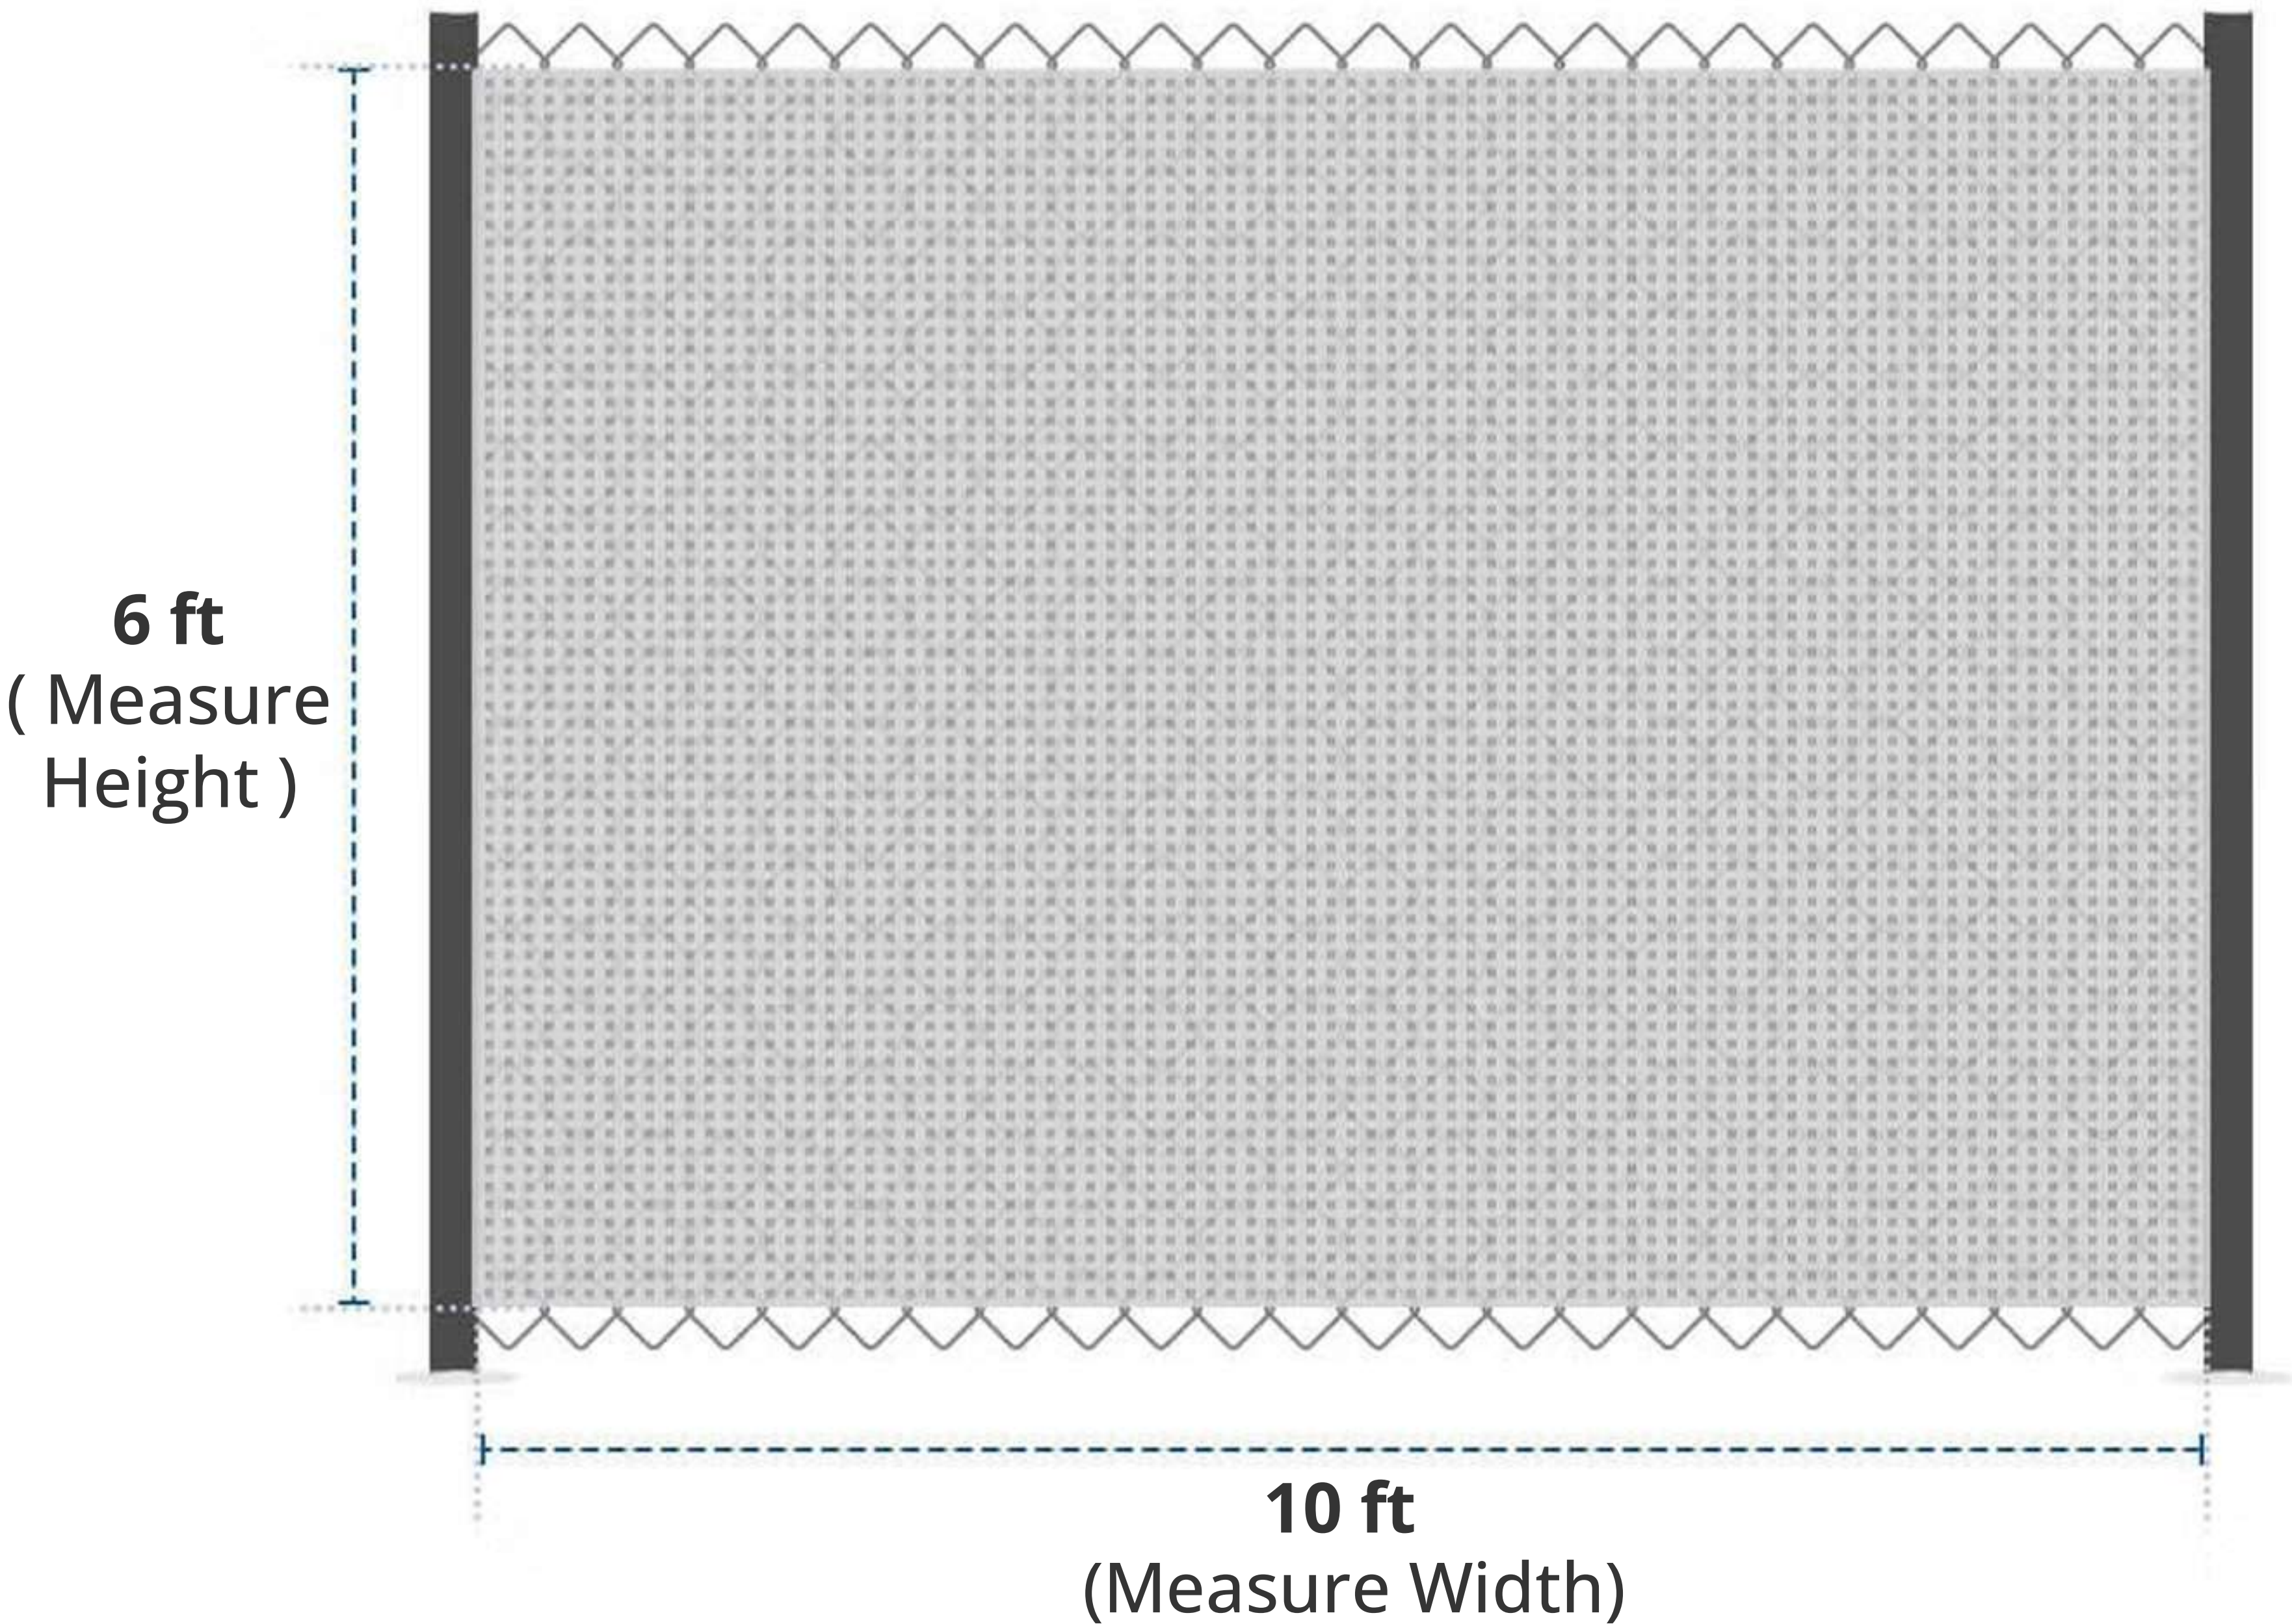

HEIGHT: 6 ft

WIDTH: 10 ft

Finished Screen Size (What You Receive)

HEIGHT: 6'1"-6'2"

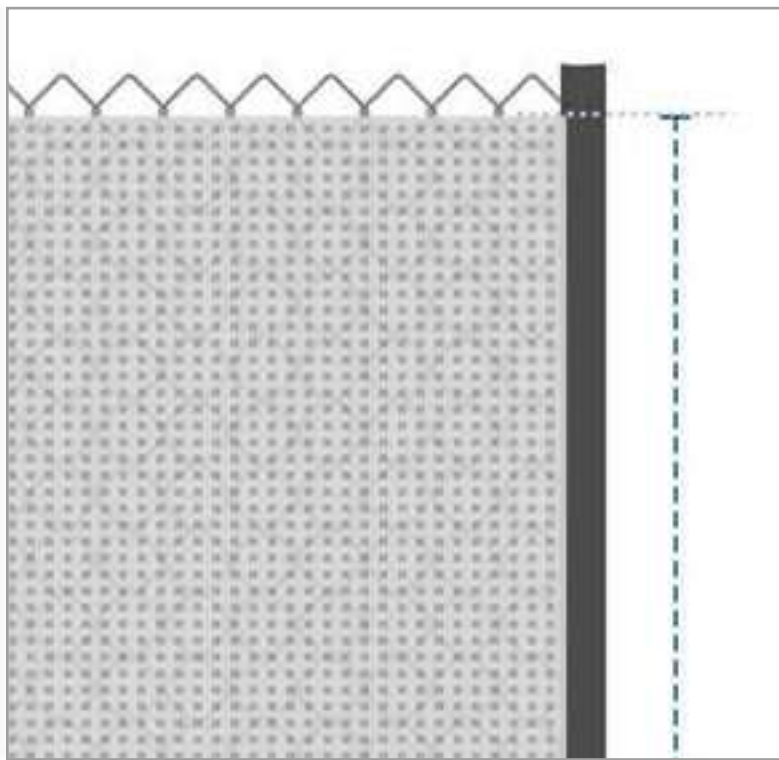

WIDTH: 10'1"-10'2"

What to Measure

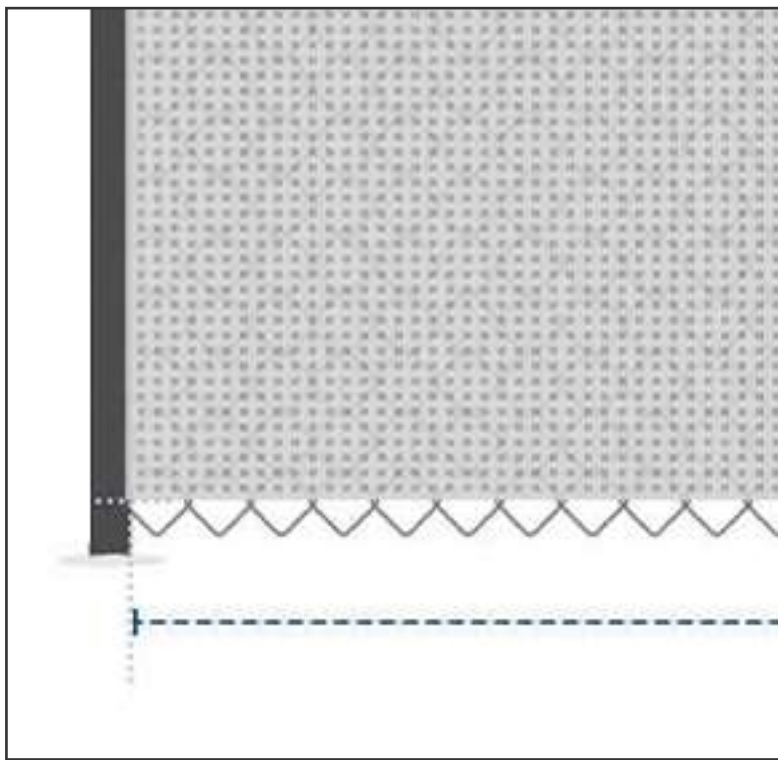

1. Height

Measure straight up from the bottom of the area you want covered to the top edge of your fence

2. Width

Measure straight across, from one end of the section you want covered to the other

Note: If your fence has any unusual angles, posts, or obstructions, snap a photo and upload it with your order, it helps our team tailor the screen to your exact setup.
